rFOIL® reflective Insulation is a layer of polyethylene bubbles bonded to and sandwiched between a radiant barrier metalized film surface and a white polyethylene sheet.

rFOIL® is specially designed to reduce radiant heat gain/loss in all residential and commercial applications. rFOIL® also helps control condensation by providing an airtight thermal break while reducing the amount of heat transfer.

Adding rFOIL® Reflective Bubble Insulation to your construction project improves the insulation value of the building envelope and significantly increases it's energy efficiency.
