**INSTALLATION METHOD**

1. Install furring strips parallel with the wall posts (spaced 24" on center).
2. Unroll rFOIL™ insulation horizontally - in the direction of the furring strips - and staple into place to the furring strips.
3. Run subsequent rFOIL™ Insulation and butt it up to the previous installed layer.
3. To ensure a continuous insulation system, seal all seams and butt joints with rFOIL™ tape.

**Builder’s Notes:**
- If a white interior finish is desired, rFOIL™ poly reflective insulation may be used. Install as per usual method, however with poly-white side facing interior.
- Use rFOIL™ white poly tape to seal all seams and butt joints.
- When rFOIL™ insulation comes in direct contact with ACQ lumber, it may discolor. This will not affect the overall insulation value of rFOIL™ insulation.

**SUGGESTED PRODUCTS FOR THIS APPLICATION:**

<table>
<thead>
<tr>
<th>rFOIL™ INSULATION PRODUCT</th>
<th>2600, 2200, or 2500 Series (Available in Various Dimensions)</th>
</tr>
</thead>
<tbody>
<tr>
<td>rFOIL™ TAPE</td>
<td>15013, 15012 (Reflective), 15853, 15852 (White Poly)</td>
</tr>
</tbody>
</table>

---

**INSTRUCTIONS:**

- IDEAL INSULATION FOR POST FRAME BUILDING APPLICATIONS
- QUICK AND EASY TO INSTALL, AND ADDS R-VALUE
- REDUCES HEAT LOSS AND HEAT GAIN ALL YEAR ROUND
- WILL BLOCK UP TO 96% OF RADIANT HEAT TRANSFER
